INSERTS
for
SUMMARIES
of
FLUID MILK MARKETING ORDERS

Revised to May 1, 1950,

and

Federal Register Citations
for the Milk Price Orders

The attached are inserts to be substituted for the corresponding pages in the Summaries of Fluid Milk Marketing Orders, April 1, 1948, and Federal Register Citations for the Milk Price Orders. These inserts revise the Federal orders as effective on May 1, 1950. The last insert was issued on March 1, 1950.

Table No. 2 - Method of determining Class I prices in Federal order markets, December 1, 1949 (without regard to temporary suspensions of pricing provisions).

1. The first part of the report
deals with the general situation
of the country and the
state of the economy.

2. The second part of the report
deals with the results of the
survey and the conclusions
drawn from it.

3. The third part of the report
deals with the recommendations
made by the committee and the
steps to be taken to implement
them.

4. The fourth part of the report
deals with the conclusions
drawn from the survey and the
recommendations made by the
committee.

5. The fifth part of the report
deals with the conclusions
drawn from the survey and the
recommendations made by the
committee.

6. The sixth part of the report
deals with the conclusions
drawn from the survey and the
recommendations made by the
committee.

7. The seventh part of the report
deals with the conclusions
drawn from the survey and the
recommendations made by the
committee.

8. The eighth part of the report
deals with the conclusions
drawn from the survey and the
recommendations made by the
committee.

- (2) Chicago 92-score butter, times 3.5, times 1.2, plus or minus 3.5 cents for each half cent that the average price per pound of nonfat dry milk solids (carlots, spray and roller process, human consumption, f.o.b. manufacturing plants in the Chicago area) is above or below 5.5 cents. (If prices for nonfat dry milk solids f.o.b. manufacturing plants are not available, use prices of nonfat dry milk solids delivered at Chicago in which event the "make" allowance is 7.5 cents.)

Class I - "Basic formula" price plus \$1.35 for the delivery periods July through December; plus \$1.10 for the delivery periods January through March; and plus 90 cents for delivery periods April through June.

If during the 12 month period prior to the month immediately preceding each of the following delivery period groups, the total volume of milk received from producers by handlers is more or less than 115 per cent of Class I milk disposed of by handlers during such 12 month period, the following adjustments are made to the Class I price.

Delivery period groups	For each percentage point that receipts from producers as a per cent of Class I milk is	
	Below 115 per cent (add)	Above 115 per cent (subtract)
	<u>Cents</u>	<u>Cents</u>
January through March	1	2
April through June	0	2
July through December	2	2

Class II - Same as "basic formula" price.

Butterfat Differentials:

Class Prices -

Class I - Chicago 92-score butter times 0.125.

Class II - Chicago 92-score butter times 0.12.

Producer Price - Same as Class II.

- (2) Price per pound of Chicago 92-score butter, times 6, plus 2.4 times the average price per pound of Plymouth "Twins" (or "Cheddars"), divided by 7, times 1.3, times 3.5;
- (3) Price per pound of Chicago 92-score butter, minus 3 cents, times 1.2, times 3.5, plus an amount computed as follows: average price per pound of nonfat dry milk solids (carlots, human consumption, spray and roller process, f.o.b. manufacturing plants in Chicago area), minus 5.5 cents, times 8.5, times .965; or
- (4) The Class III price.

Class I - "Basic formula" price plus 75 cents during May and June, and plus 95 cents during July, August, March, and April, and plus \$1.05 during all other months.

Class II - "Basic formula" price plus 15 cents during May and June, 45 cents during September through December, and 35 cents during all other months.

Class III - Average of prices paid for 3.5 per cent milk at the following plants:

Van Camp Milk Company,	Wauseon, Ohio
Pet Milk Company,	Delta, Ohio
Defiance Milk Products Company,	Defiance, Ohio
Pet Milk Company,	Hudson, Michigan

Butterfat Differentials:

Class I Price - Price per pound of Chicago 92-score butter, times 1.3, divided by 10.

Class II Price - Price per pound of Chicago 92-score butter, times 1.25, divided by 10.

Class III Price - Price per pound of Chicago 92-score butter, times 1.2, divided by 10.

Producer Price - Price per pound of Chicago 92-score butter, times 1.2, divided by 10.

Location Differentials:

None.

Expense of Administration:

Handlers pay administrative cost not to exceed 2 cents per hundred-weight.

Special Producer Provisions:

Deductions as authorized by members are turned over to the cooperative associations.

A marketing service charge not to exceed 4 cents is deducted for non-members.

Upon request by a cooperative association, handlers are required to make partial and final payments to the association for milk delivered by association members.

On or before the last day of each delivery period handlers are required to make a partial payment for milk received during the first 15 days of the delivery period at not less than the minimum price for the preceding delivery period (in the case of payments directly to producers the minimum price for preceding delivery period minus 50 cents per hundredweight).

Class Prices (4.0 per cent butterfat):

Class I - \$5.56 (\$5.11 for months of April, May, and June). An upward adjustment of 40 cents is provided when the price per pound of New York 92-score butter is 82 cents or more, and a downward adjustment of 40 cents is provided when the price of such butter is 67 cents or less.

The price is at least \$5.02 per hundredweight during April, May, and June 1950.

Class II - Sum of butterfat and skim values.

Butterfat value is computed as follows: Average of specified quotations per 40-quart can of 40 per cent cream in the Philadelphia market, divided by 33.48, times 4, minus 26.5 cents.

The butterfat value of milk used to make butter is computed as follows: Price per pound of New York 92-score butter, times 1.2, times 4, minus 19 cents. This value does not apply if it is more than the value of other Class II butterfat.

Skim milk value is computed as follows: Average price per pound of nonfat dry milk solids (roller process, other brands, human consumption, carlots, bags or barrels as published in "Producers' Price Current") times 7.5, minus 54 cents in April, May, and June (and March and July 1950) and minus 44 cents in other months.

Premium for Grade A Milk - 40 cents if bacteria is below 10,000 per c.c.; 25 cents for 10,000 to 25,000. This premium is multiplied by the ratio of Grade A milk sold either in fluid form or as products manufactured from Grade A milk to the total quantity of Grade A milk received from producers. Two cents additional butterfat differential shall be paid for each one-tenth of one per cent in the butterfat test of such milk above 3.7 per cent.

Outside Purchases:

Milk or skim milk received during the months October through January may be pro rated by the receiving handler in accordance with the class use of producer milk. Handler may, if he wishes, allocate a greater proportion of outside milk to Class II. In the absence of allocation by the handler, the market administrator will allocate outside milk to Class II to the extent that handler has utilization in that class.

Milk or skim milk during the months February through September is allocated to Class II unless receiving handler does not have sufficient producer milk to cover his Class I utilization. Cream received from outside sources is allocated to Class II.

The milk or skim milk equivalent of dry milk, nonfat dry milk, condensed milk, and condensed skim milk is allocated to Class II up to the amount of Class II utilized by the handler.

Outside Sales:

Milk moving as milk or skim milk to the plant of a nonhandler is Class I unless a written agreement as to other utilization is presented to the market administrator subject to verification by him. Cream disposed of to a nonhandler is Class II.

The price to be paid by handlers for Class I milk disposed of outside the marketing area shall be, as ascertained by the market administrator, such price as is being paid to farmers in the outside market for milk of equivalent use, less the applicable transportation allowance in such outside market up to 64 cents. If the market administrator is unable to determine such a price, the Class I price shall apply.

Producer-handlers:

Handlers who distribute only milk of their own production are exempt from regulatory provisions. Reports may be required by the market administrator.

Expense of Administration:

Handlers pay administrative costs not to exceed 2 cents per hundredweight.

Special Producer Provisions:

The order does not require that deductions as authorized by members be turned over to cooperative associations.

No provision is made for marketing service charges to be deducted for non-members.

Class Prices (for butterfat and skim milk):

Basic Formula Price - The "basic formula" price per hundredweight for skim milk is the highest of the prices determined pursuant to (a), (b), or (c) below for the preceding delivery period multiplied by 0.311.

The "basic formula" price per hundredweight for butterfat is the highest of the prices determined under (a), (b), or (c) below for the preceding month multiplied by 20.

- (a) Price paid for 3.5 per cent milk at 18 specified plants (see list under Chicago order).
- (b) 92-score butter at Chicago multiplied by 6,
PLUS
price per pound of "Twins" at Plymouth, Wisconsin (or if "Twins" are not quoted, then "Cheddars"), times 2.4--
Divide the above sum by 7, add 30 per cent and multiply by 3.5.
- (c) Carlot price per pound nonfat dry milk solids (spray and roller process, human consumption, at Chicago area plants) multiplied by 8.2 and subtract 56 cents
PLUS
price per pound of 93-score butter at Chicago multiplied by 4.24 and deduct 11 cents. (If no price is quoted for 93-score butter, the highest prices quoted for 92-score butter are used.)

Class I - Price per hundredweight for butterfat and skim milk are the respective "basic formula" prices plus the following:

<u>Delivery Period</u>	<u>Skim Milk</u>	<u>Butterfat</u>
May and June	\$0.156	\$10.00
September through December	.280	18.00
All other months	.218	14.00

Class II - Same as Class I except that Class II butterfat may not be less than the price for Class III butterfat.

Class III (Per hundredweight for skim milk and butterfat) -

- (a) Determine the separate percentages that the butter value and the nonfat dry milk solids value are to the total nonfat dry milk solids-butter price provided for by (c) under "basic formula" price.
- (b) Apply these percentages to the average of prices paid for 3.5 milk at the following plants:

<u>Operator</u>	<u>Location</u>
Goshen Milk Condensing Company,	Goshen, Indiana
Richfield Creamery Company,	Warsaw, Indiana
New Paris Creamery Company,	New Paris, Indiana

(Provided that if the price paid at the above plants is less than that determined by the dry milk solids-butter formula under "basic formula" price the latter price is used.)

- (c) Divide the separate values for skim milk and butterfat by 0.965 and 0.035 respectively. The respective results shall be the prices per hundredweight for skim milk and butterfat in Class III.

Class IV (per hundredweight for skim milk and butterfat) -

Skim milk - The skim milk component of "(c)" under "basic formula" price divided by 0.965.

Butterfat - The butterfat component of "(c)" under "basic formula" price divided by 0.035.

Butterfat Differentials:

Class Price - None. Butterfat and skim milk priced separately.

Producer Price - 92-score butter at Chicago multiplied by 0.12 and rounded to the nearest one-tenth of a cent.

- (2) Price per pound of Chicago 92-score butter times 6,
PLUS
2.4 times the price per pound of Plymouth "Twins" (or
"Cheddars") divided by 7, times 1.3, times 4.
- (3) Chicago 92-score butter times 4.8,
PLUS
3.75 cents for each full 1/2 cent that the price per pound of
nonfat dry milk solids for human consumption, spray and roller
process, f.o.b. Chicago manufacturing plants, is above 5 cents.
(If f.o.b. manufacturing plant prices are not available, use
prices of nonfat dry milk solids delivered at Chicago in which
event the "make" allowance is 6 cents instead of 5 cents.)
- (4) The Class II price.

Class I - "Basic formula" price plus \$1.30 for the delivery periods
of December through March; plus \$1.10 for the delivery periods of
April through July; and plus \$1.50 for the delivery periods of
August through November.

The price is not less than \$5.40 per hundredweight for December 1949
and \$5.00 per hundredweight for January, February, and March 1950.

Class II - The average of prices paid for 4.0 per cent milk at 10
manufacturing milk plants located in Kentucky, Tennessee, Virginia,
North Carolina, and South Carolina.

From April through August 1950, milk transferred to a nonfluid milk
plant between 15 and 80 miles from the City Hall at Knoxville or
diverted directly from a farm to such a nonfluid milk plant and
used for condensing or cheese manufacture is priced at the Class II
price minus 15 cents per hundredweight, minus 0.187 cents per
hundredweight for each mile from the City Hall in Knoxville and the
nonfluid milk plant. Milk used to produce butter is priced at the
average price per pound of 90-score butter at Chicago times 4, plus
10 per cent and minus 30 cents.

Butterfat Differentials:

Class Prices -

Class I - Chicago 92-score butter times 0.14.

Class II - Chicago 92-score butter times 0.12.

For milk transferred or diverted (as described under Class II) the
butterfat differential is computed as follows: Price per pound of
92-score butter at Chicago times 1.1, divided by 10. For milk used
to produce butter the butterfat differential shall be the price for
milk of 4.0 per cent butterfat content made into butter divided by
40.

Producer price - Same as on Class II milk which is not transferred
or diverted.

Location Differentials:

None.

Method of Accounting for Milk:

Weights of butterfat and skim milk are computed separately as used in each class.

Type of Pool:

Market-wide, monthly pool without base rating plan or new producer clause.

Interhandler Transfers:

Transfers of milk and cream to other handlers may be in accordance with a written agreement between the two handlers provided the quantity of milk in Class II does not exceed the amount classified in such class by the transferring handler.

"Other source" milk is required to be account for in such a way that the highest available classification is given to producer milk. Transfers of milk, skim milk, and cream to producer-handlers are classified as Class I.

Outside Purchases:

Deducted first from Class II, then if necessary from Class I.

Outside Sales:

Milk, skim milk, and cream transferred to a non-handler is Class I. If statement is signed by the buyer and seller milk, skim milk or cream may be classified in accordance with such statement subject to verification.

Milk sold outside the marketing area is priced the same as milk sold in the marketing area.

Producer-handler:

Handlers who distribute only milk of their own production are exempt from regulatory provisions. Reports may be required by the market administrator.

Expense of Administration:

Handlers pay administrative costs not to exceed 4 cents per hundred-weight.

Special Producer Provisions:

Deductions as authorized by members are turned over to cooperative associations. A marketing service charge not to exceed 6 cents per hundredweight is deducted for non-members.

Producers receive payments on account on deliveries during the first 15 days of each delivery period at the rate of 75 per cent of the uniform price for the preceding delivery period.

At the time of making payments to producers, handlers furnish a statement to producers showing quantity of milk delivered, uniform price, adjustments, deductions, etc., and total value of milk.

Special Handler Provisions:

If a handler accounts for the disposition of more milk (after making adjustments for receipts of milk from other handlers, etc.) than he accounts for as milk received from producers, the value of such milk is included in the handler's total obligation.

Oklahoma City, Oklahoma

Marketing Area:

Oklahoma County (except Deer Creek, Edmond, Lincoln, Deep Fork, Luther and Elk townships and Sections 23, 24, 25, and 26 of Choctaw township) and townships of Moore, Taylor, Case, Liberty, Norman, and Noble in Cleveland County, Oklahoma.

Handler:

- (1) A person who operates an approved plant (i.e., a plant approved by a health authority (municipal, State or Federal having jurisdiction in the marketing area) from which milk, skim milk, buttermilk, flavored milk drinks or cream is disposed of for fluid consumption in the marketing area).
- (2) A cooperative association with respect to producer milk which it diverts to an unapproved plant for the account of such cooperative association.

Producer:

A person who produces Grade A milk under a farm permit or rating issued by a local health authority or who produces milk acceptable to a Federal agency and whose milk is delivered to an approved plant. (Producer maintains status when his milk is temporarily diverted to an unapproved plant.)

Classification:

Class I - Milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream, cultured sour cream, aerated products containing milk or cream and any mixture (except bulk ice cream mix) of cream, milk or skim milk, and milk not specifically accounted for as Class II.

Class II - Products other than those classified in Class I, livestock feed, shrinkage of producer milk not in excess of 2 per cent, shrinkage in "other source" milk, and inventory variation.

Class Prices (4.0 per cent butterfat):

A "basic formula" price is used in determining the Class I price. "Basic formula" price is the higher of the following prices for the preceding month:

- Weights of butterfat and skim milk are computed separately as used in each class.

Type of Pool:

Market-wide monthly pool without base rating plan or new producer clause.

Interhandler Transfers:

Milk, cream or skim milk transferred to the plant of another handler is Class I milk. If statements are filed by transferring handler and receiver (except a producer-handler) it is classified in accordance with such statement subject to verification. If either handler has received "other source" milk, the transfer must be classified in a way to give the highest utilization to producer milk.

Outside Purchases:

Deducted in series beginning with Class II.

Outside Sales:

Sales of milk and cream to non-handlers are classified in Class I except that:

- (a) Cream transferred without Grade A certification to an unapproved plant more than 200 miles from the approved plant is classified as Class II, and
- (b) Milk, skim milk or cream transferred to an unapproved plant not more than 200 miles from the approved plant may be classified as Class II under specified conditions.

Milk sold outside the marketing area is priced the same as milk sold in the marketing area.

Producer-handler:

A person who is both a producer and a handler and who receives no milk from other producers is not subject to the pricing provisions of the order but must make certain reports to the market administrator upon request by him.

Expense of Administration:

Handlers pay administrative costs not to exceed 4 cents per hundredweight on milk received from producers and on "other source" milk which is classified as Class I.

Special Producer Provisions:

Deductions as authorized by members are turned over to cooperative associations.

A marketing service charge not to exceed 5 cents per hundred-weight is deducted for non-members.

Payments on account are made to producers for milk delivered during the first 15 days of each month at the Class II price for the preceding month. If a cooperative association of producers requests it, handlers are required to pay to the association at least 3 days before the end of the month the total value of members' milk received during the first 15 days of the month.

Special Handler Provisions:

Handlers who the Secretary determines dispose of a greater proportion of their milk in another federally regulated market are not subject to this order but such handlers are required to make reports under this order.

If a handler subject to another order disposes of Class I milk under this order, he pays into the producer settlement fund the amount, if any, by which the value of such Class I milk is greater than the value of such Class I milk as computed pursuant to the other order.

Tulsa, Oklahoma

Marketing Area:

Tulsa County, the city and township of Sapulpa in Creek County, and a part of Black Dog township in Osage County, Oklahoma.

Handler:

- (1) A person who operates an approved plant (i.e., a plant approved by any health authority having jurisdiction in the marketing area from which milk, skim milk, buttermilk, flavored milk, flavored milk drinks or cream is disposed of in the marketing area).
- (2) A cooperative association with respect to producer milk which it diverts to an unapproved plant for the account of such cooperative association.

Producer:

A person (except a producer-dealer) who produces Grade A milk under a farm permit or rating issued by a local health authority which milk is delivered to an approved plant. (Producer maintains status when his milk is temporarily diverted to an unapproved plant.)

Classification:

Class I - Milk, skim milk, buttermilk, flavored milk, flavored milk drinks, cream, cultured sour cream, aerated products containing milk or cream and any mixture (except bulk ice cream mix) of cream, milk or skim milk, and milk not specifically accounted for as Class II.

Class II - Products other than those classified in Class I, live-stock feed, shrinkage of producer milk not in excess of 2 per cent, shrinkage in "other source" milk, and inventory variation.

Class Prices (4.0 per cent butterfat):

A "basic formula" price is used in determining the Class I price. "Basic formula" price is the higher of the following prices for the preceding month:

- (1) Prices paid for 3.5 per cent milk at 18 Midwest manufacturing plants (see Chicago order for list) adjusted to a 4.0 per cent basis by dividing the average price at the 18 plants by 3.5 and multiplying by 4.
- (2) Price per pound of 92-score Chicago butter minus 3 cents, times 1.2, and times 4.0
 PLUS
 price per pound for nonfat dry milk solids (carlots, spray and roller process, human consumption, at manufacturing plants in the Chicago area) minus 5.5 cents, multiplied by 8.5, and multiplied by 0.96.

Class I - To the "basic formula" price add the following: April, May, June, and July - \$1.25; all other months - \$1.65. (The price for September, October, November, and December shall not be less than that for the preceding month and the price for April, May, and June shall not be higher than that for the preceding month.)

Class II - Average price paid for milk of 4.0 per cent butterfat content received from farmers at the following places:

<u>Present Operator</u>	<u>Location</u>
American Foods Co.,	Miami, Oklahoma
Gilt Edge Dairy,	Norman, Oklahoma
Page Milk Co.,	Coffeyville, Kansas
Pet Milk Co.,	Siloan Springs, Arkansas

Butterfat Differentials:

Class I - Price per pound 92-score butter at Chicago for the preceding month, times 1.25, divided by 10.

Class II - Price per pound 92-score butter at Chicago times 1.15, divided by 10.

Producer price - Price per pound 92-score butter at Chicago times 1.2, divided by 10.

Location Differentials:

To handlers - On milk, skim milk or cream moved from a plant more than 35 miles from Tulsa to the marketing area, the following differentials apply:

<u>Distance from the city hall in Tulsa</u>	<u>Cent per Hundredweight</u>
35 to 50 miles - - - - -	15
50.1 to 65 miles - - - - -	17
65.1 to 80 miles - - - - -	19
80.1 to 95 miles - - - - -	21
95.1 miles or over - - - - -	23

To producer's - The rates of location adjustment to handlers apply on all milk received from producers at plants more than 35 miles from Tulsa.

Method of Accounting for Milk:

Weights of butterfat and skim milk are computed separately as used in each class.

Type of Pool:

Market-wide monthly pool without base rating plan or new producer clause.

Interhandler Transfers:

Milk, cream or skim milk transferred to the plant of another handler is Class I milk. If statements are filed by transferring handler and receiver (except a producer-handler) it is classified in accordance with such statement subject to verification. If either handler has received "other source" milk, the transfer must be classified in a way to give the highest utilization to producer milk.

Outside Purchases:

Deducted in series beginning with Class II.

Outside Sales:

Sales of milk and cream to non-handlers are classified in Class I except that:

- (a) Cream transferred without Grade A certification to an unapproved plant more than 200 miles from the approved plant is classified as Class II, and
- (b) Milk, skim milk or cream transferred to an unapproved plant not more than 200 miles from the approved plant may be classified as Class II under specified conditions.

Milk sold outside the marketing area is priced the same as milk sold in the marketing area.

Producer-handler:

A person who is both a producer and a handler and who receives no milk from other producers is not subject to the pricing provisions of the order but must make certain reports to the market administrator upon request by him.

Expense of Administration:

Handlers pay administrative costs not to exceed 4 cents per hundredweight on milk received from producers and on "other source" milk which is classified as Class I.

Special Producer Provisions:

Deductions as authorized by members are turned over to cooperative associations.

A marketing service charge not to exceed 5 cents per hundredweight is deducted for non-members.

Payments on account are made to producers for milk delivered during the first 15 days of each month at the Class II price for the preceding month. If a cooperative association of producers requests it, handlers are required to pay to the association at least 3 days before the end of the month the total value of members' milk received during the first 15 days of the month.

Special Handler Provisions:

Handlers who the Secretary determines dispose of a greater proportion of their milk in another federally regulated market are not subject to this order but such handlers are required to make reports under this order.

If a handler subject to another order disposes of Class I milk under this order, he pays into the producer settlement fund the amount, if any, by which the value of such Class I milk is greater than the value of such Class I milk as computed pursuant to the other order.
